KOETSCHET, Pauline. Abū Bakr al-Rāzī et le signe: fragment retrouvé d'un traité logique perdu. *Arabic Sciences and Philosophy*, 27 i (2017) pp. 75-114. Argues that a fragment from a lost treatise by Abū Bakr al-Rāzī (d. 925) is preserved in the "Book on Morphology" (*Kitāb al-Taṣrīf*) by Ps-Jābir ibn Ḥayyān. This fragment represents an early attempt to analyse the logical structure of sign-based inference in Arabic (*istidlāl bi-'l-shāhid 'alā 'l-ghā'ib*) among theologians and philosophers. Rāzī's theory of sign-inference is situated in the context of its prominent use among the *mutakallimūn* and shown to be an important source of al-Fārābī's logical developments especially in his *Epitome of the Prior Analytics*.

4320 DELVA, Thijs. The Abbasid activist Ḥayyān al-'Attār as the father of Jābir b. Ḥayyān: an influential hypothesis revisited. *Journal of Abbasid Studies*, 4 i (2017) pp. 35-61. Shows that there is no family relationship between the Abbasid activist Ḥayyān al-'Attār and the alchemist Jābir b. Ḥayyān, whose historicity is likewise called into question.

*Jābir b. Ḥayyān*
