

LANDAU, Justine. Plus ou moins que deux: le *tašdīd*.  
dans la tradition métrique persane. *Bulletin d'Études  
Orientales*, 65 / 2016 (2017) pp. 135-156. "In  
Persian, the *tašdīd* became a device to implement  
Hililian metrics (*'arīd*) in a language insensitive to  
consonant length. It is the object of our paper to  
examine this intriguing facet of Persian gemination,  
which remains widely unexplored." Abstract(s):  
English & Arabic.
